# 30SCULPT NEO HIFEM+ & RF

Non-Invasive Fat Burning & Muscle Building

## 30 SCULPT NEO BODY SCULPTING **\$500** per session

4 sessions recommended for best results.

30SCULPT NEO is based on an applicator simultaneously emitting synchronized RF and HIFEM+ energies.

Due to the radiofrequency heating, the muscle temperature quickly raises by several degrees. This prepares muscles for exposure to stress, similar to what a warm up activity does before any workout. In less than 4 minutes, the temperature in subcutaneous fat reaches levels that cause apoptosis, i.e. fat cells are permanently damaged and slowly removed from the body. Clinical studies showed on average **a 30% reduction in subcutaneous fat.\***

Bypassing the brain limitations, HIFEM+ energy contracts the muscle fibers in the area at intensities that are not achievable during voluntary workout. Extreme stress forces the muscle to adapt resulting in an increase in the number and growth of muscle fibers and cells. Clinical studies\* showed on average **a 25% growth in muscle volume.**

Good for: abs, buttocks, arms, and legs.

**Based on clinical studies one 30 minute session is equivalent to manually doing 24,000 ab crunches**

## 30 SCULPT PELVIC FLOOR TIGHTENING **\$300** per session

6 sessions recommended for best results.

During this treatment, the 30SCULPT machine exercises the pelvic floor muscle through a tightening stimulation that exceeds the limit of the human body. It goes deep 10cm directly to the deep layer of the pelvic floor muscles. The benefits of improving these muscles for women include: enhancing bowel control, preventing or improving the sagging of the bladder, uterus, or bowel, reduction of urine-leakage caused by coughing or sneezing, and improvement of muscle tone (especially after delivery to prevent postpartum dysfunctional incontinence).

Good for: pelvic floor/vaginal tightening
